

Understanding that all inventories of non-complying materials must be depleted by January 4, 2014, it is critical to plan now!

We are ready to help!

## NO-LEAD PLANNING CHECKLIST

- Consultation with Team EJP
- Schedule a Planning Meeting
- Existing Inventory Review
- Establish Liquidation Timeline
- Team Approach to Implementation
- Early Inventory Liquidation

## WE CAN PREDICT THE FUTURE!

1. Those water operators who react early will hold the best and most affordable options for making a smooth transition.
2. Delaying reaction to this new law will be costly. Inventory held after the new law takes effect will not be usable and will have virtually no resale value.
3. The value of non-compliant waterworks brass will drop at an alarming rate as the 2014 deadline approaches.
4. The Team EJP commitment to total customer satisfaction has been Job one since the founding of the company in 1955. Call us today. We are here to help!

## NO-LEAD BRASS... TIME IS RUNNING OUT... WE WANT TO HELP YOU!

## LET'S GET THE LEAD OUT!

The Reduction of Lead in Drinking Water Act was signed into law by the President of the United States on January 4, 2011. The new law takes effect on January 4, 2014. This new law is having a profound impact on the use of waterworks brass in the drinking water industry.

This amendment to the Clean Drinking Water Act will reduce the allowable lead content in any brass products that touch the

wetted surfaces in potable drinking water systems. The reduction in lead content is very dramatic, from levels as high as 8 percent down to 0.25 percent.

Team E.J. Prescott, a leading supplier of waterworks brass

products, stands ready to help you put a plan in place to go lead free well in advance of the 2014 deadline. Company leadership has established an April 2, 2012 deadline for its compliance with this new law.

**Solid planning will help assure a smooth transition!**

**WE ARE PROUD DISTRIBUTORS OF:**

A.Y. McDonald — New England and New York

Ford Meter Box — Indiana and Ohio

Red Hed Manufacturing — Everywhere!

# NO-LEAD BRASS...

# TIME IS RUNNING OUT...

# ARE YOU READY?

In all publications of PEPtalk & SERVICEtalk, we are printing on paper that contains recycled fiber.

Red Hed Manufacturing has offered a complete line of waterworks brass since 1921. **Since 2004 all of our corporations, curb stops, lead flange adapters, and couplings have been lead free.** Red Hed is the patent holder of the FM-UL Approved Space Saver Flange for when space is limited and reduction is a must. Red Hed products are proudly manufactured right here in the United States. Innovation and quality remain our trademarks.

## Features and Benefits

Red Hed Manufacturing products are "Made in the USA" and conform to AWWA required specifications, and are 100% tested before they leave our facility.

Our complete product line has been field-tested and proven to be reliable and dependable to stand against the pressures of time.

All Red Hed products are machined and assembled in our facility; nothing is outsourced. This assures that all Red Hed products meet the quality you expect. In 2004, Red Hed Manufacturing made a commitment to go Lead Free (ANSI: NSF-60 & 61) on all its

brass products ensuring healthier, safer drinking water for you and your customers.

The industry changes on a daily basis. Buying Red Hed Lead-

## Rebuilding Tapping & Drilling Machines and Drill Bit Sharpening

Red Hed Manufacturing repairs and reconditions drilling and tapping machines to their original machine specifications, assuring that reworked machines will perform as good as new. Our tool-making craftsmanship and extensive parts inventory will eliminate costly downtime. This service includes a complete teardown of the machine, new parts as needed, sandblasting, greasing and repainting.

Free Brass puts you ahead of the curve to meet future lead free specifications.

Red Hed Manufacturing has true "job-shop" capabilities as well as volume production. We pride ourselves on our staff, equipment, and skill. Put us to work for you.

All products sold from Red Hed Manufacturing are warranted to be free from defects in materials and workmanship for a period of one year from date of sale, provided such products are used and installed properly for their intended purpose.

## Waterworks Brass

Red Hed waterworks brass products are designed and manufactured in accordance with the latest revision of **AWWA standard C800**, including thread dimensions and are now all manufactured from LEAD-FREE brass in accordance with ANSI: NSF-60 & NSF-61.

**Curb Stops** are available in any end configuration. Top quality Red Hed **Ball Curbs** can be manufactured from 3/4" -2" sizes and made to open right or left. Red Hed **Ball Valves** are full port, featuring solid-brass balls with teflon™ coating for ease of use and years of dependability.

Red Hed **Ball Corps** are commonly sized 3/4" to 2", and can be machined with AWWA thread (CC) or iron pipe thread (IP) to suit your direct and saddle tap needs.

Red Hed **Brass Fittings** for copper service and polyethylene tubing are carefully designed, manufactured and

tested for long, dependable service.

Team Red Hed Lead-Free Adapters can connect old lead valve services that cannot be removed. Red Hed offers various sizes and thread patterns; just screw it to the service and apply either copper to the compression or a flare end fitting. When you need to "Get the Lead Out" call Team Red Hed and Team EJP for the solution to your water needs!

All Red Hed products are inspected repeatedly during manufacturing, then hydrostatically pressure tested.
