Service Box Accessories

Service Box Foot Piece

Heavy Design

The service box foot piece is used to install an Erie or Buffalo Style service box over curb stops larger than 1". The foot piece is centered over the curb stop and the service box is then installed over the neck of the foot piece. The neck of the foot piece fits snugly into the arch of the service box to provide a stable and tight fitting installation. The foot piece fits all standard 1" Erie Style service boxes.

Service Box Extensions

$\frac{5}{16}$" hardened cup point set screws for extra holding power and adjustability

Extension with Set Screw

Our service box extensions are made from Schedule 40 pipe and are used to increase the height of an existing service box or to accommodate greater depth in a new installation. The service box extension is installed by removing the existing cover and sliding the extension over the top of the box pipe. The extension is adjusted to the desired height and the set screw(s) are tightened to lock it in place before replacing the cover. Extensions are made in lengths from 3" to 24".
