

# Manhole Castings L-14

# MA, ME, NH & VT Catch Basin

Details of grate indicate water flow is from left to right

## Cascade Catch Basin Frame & Grate

The QWP 45-600 Cascade Catch Basin offers the same high-grade material as the "State DOT Standard" casting but is an economical alternative. Weight is reduced by removing material in noncritical areas of the casting. The cascade grate combines the excellent water handling abilities of the "cascade" principal with safety for bicycle and foot traffic. Wherever sloped roads normally dictate parallel bars and bicycle or foot traffic is expected, this "cascade catch basin" should be used.

### Features:

- Reduced excess weight
- Economical alternative to DOT standard
- High strength casting
- Nonrocking grate
- Solid covers are available

### Specifications:

- Quality cast frame and grate
- Bituminous coated
- Nonrocking grate
- Gray cast iron meets ASTM A48 Class 30
- H-20 load rated
- Frame available in 4", 6" and 8" heights, with 3 or 4 flanges

FRAME STYLE	B 3 FLG.	BB 4 FLG.	H (inches)	H1 (inches)
4" x 3 Flange	29 1/4"	—	4	1 3/8
