Pipe Fabrication

Pipe Fabrication and Specialty Products for the Water and Wastewater Industry

Quality Water Products has been manufacturing and distributing waterworks products throughout the Northeast since 1978. As a member of the National Association of Pipe Fabricators, we are third party inspected by The National Sanitation Foundation (N.S.F.) to ensure the highest quality workmanship and full compliance with ANSI/AWWA standards.

Estimating & Sales Department

Our veteran sales and estimating staff is a knowledgeable group with years of experience. We can provide detailed item-by-item take-offs for any size treatment plant or pump station, as well as assist you with technical help you may need along the way. Our job is to make sure that your next project goes smoothly.

Fabrication & Machine Shop

In response to the growing need to expand the "Full Service Concept," Quality Water Products offers pipe fabrication and direct technical support. These services are available at our fabrication facility in South Barre, Massachusetts. The QWP machine shop is geared specifically to produce all types of flanged and grooved pipe as well as drilling, tapping, welding and other diverse fabrications. All procedures are certified

by N.S.F. to ensure that our flanged ductile iron pipe conforms to ANSI/AWWA C115/A21.15 and that our grooved pipe conforms to AWWA C606.

QWP's fabrication facility is capable of handling pipe sizes from 3" to 42" in lengths up to 20 feet and can fabricate flanged ductile iron pipe to your exact requirements.

Castings

For 25 years, QWP has been a trusted source of leading-edge products for the water and wastewater industries. Working with our partner foundries and manufacturers, we have been able to develop and distribute whole lines of specialized products, including:

A Complete Line of Valve and Service Boxes

Features both slide and screw type as well as the most complete selection of the various risers for all types of boxes including valve, service, Erie and roadway.

Meter Box Covers

QWP is one of the largest manufacturers of North American meter box covers and is also capable of producing piped meter pits for up to 2" meters plus specialty pits such as our flush type hydrant pit.

Frames and Covers

QWP's is the name behind successful products like the Pav-Loc frame, Quick Rise, EZ Rise and Lok-N-Rise covers, to name just a few.

CertainTeed line of Ductile Iron Manhole Frames & Covers

QWP has been an authorized CertainTeed master stocking distributor since 1987.

The Quality Water Products complex is located on 14 acres in South Barre, Massachusetts. This expansive facility enables QWP to maintain inventory levels consistent with today's needs with the capacity to handle all your future requirements.

For water products you can count on, call the team that stands for QUALITY and SERVICE — QWP.

New Concept Tools

New Concept Tools is devoted entirely to the manufacture and distribution of a full line of superior water, sewer and drain utility hand tools and specialty products.

Designed and built by people with decades of experience in various utility fields, all products of New Concept Tools are time-and field-tested, and will stand up to the toughest jobs. We won't sell a tool or specialty product until we're sure it will perform beyond our customers' expectations.

We also do custom fabrication work. If you need a wrench or specialty item in an unusual size or length, call us. If you have a tool or design that will make doing a particular job easier or safer, and you think your product is something that will benefit the waterworks industry, call us. Perhaps we can manufacture and/or distribute this item for you.

We think you will agree that this is the finest line of waterworks hand tools and specialty products available. We guarantee our products and your satisfaction. All products sold by New Concept Tools are warranted to be free from defects in materials and workmanship for a period of one year from date of sale, provided such products are used properly for their intended purpose.

New Concept Tools

Most of our products are redesigned versions of tools that have been in use for years. We have improved the way they work and made them tougher by using heavy-duty materials such as Schedule 80 pipe, solid steel stock or ductile iron instead of lightweight tubular steel or cast iron as many companies do. Although our products are made using improved designs and stronger materials they are still competitively priced...and of course, they all come with our 100% satisfaction guarantee!

Setters, Slings & Pipe Cleaners

Valve Setter*

MH-CB Setter Sling

Precast MH Barrel Sling

Hydrant Setter*

CB Grate Sling

* Valve Setter & Hydrant Setter are pull-tested, certified and tagged with capacity.
