

Valve Insertions 4" thru 12"*

EJP Service Department Installing a QuikValve™

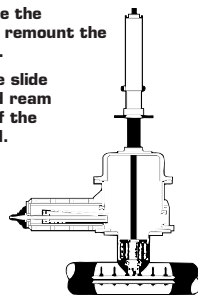

Installing the QuikValve™ Under Pressure Is As Easy As 1,2,3,4

1 Mount the sleeve on the main and drill the pipe

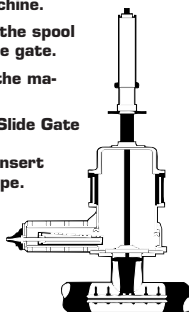

2 Ream the pipe wall

- Dismount the machine.
- Assemble the Reamer, remount the machine.
- Open the slide gate and ream the ID of the pipe wall.

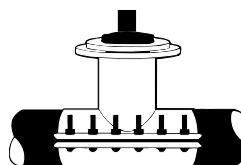

3 Close the Slide Gate

- Dismount the machine. Assemble the valve to the machine.
- Assemble the spool to the slide gate.
- Remount the machine.
- Open the Slide Gate and press the valve insert into the pipe.
- Tighten all bolts and dismount the equipment.

4 Install the Valve Nut

The QuikValve™ has just been inserted in the open position.

This Service Includes:

- The necessary equipment, machine, tools and personnel to install an in-line insertion valve in an existing line while under pressure.
- EJP will supply the necessary insertion valve and sleeve for the size pipe receiving the inserting valve.
- The workmanship and materials are guaranteed and the insertion is covered by liability insurance.

NOTES:

- Due to the unknown condition of interior of existing pipe; 100% shutdown is not guaranteed.
- Due to variations in pipe outside diameters we request an actual O.D. measurement be taken of the pipe receiving the insertion valve prior to ordering the valve and sleeve.
- * For sizes greater than 12" please contact your local Team EJP Sales office.

Benefits:

- A control valve is placed in-line, under pressure, with no interruption of service.
- No loss of industrial service or fire protection.
- Control valves provide protection should breaks occur or partial shut-downs become necessary.
- Helps to reduce the hazards of backflow contamination.

Customer Responsibilities:

- Necessary excavation (dimensions provided by EJP).
- Trench shoring as needed.
- Outside diameter of pipe.
- Pipe in area of insertion must be clean and free of raised lettering.
- Special requirements may be necessary depending on existing conditions. Please contact your local Team EJP sales office for further information.
