

Hydrants D-21

800-EJP-24 HR

D

The Eclipse #2 Post Hydrant

#2 Post Hydrants have many features comparable to full size AWWA hydrants

Features:

- 1 Comes with either one or two nozzles of the size you select.
- 2 Interior parts can be replaced without disturbing any connections by unbolting the top cap and withdrawing the inside working parts.
- 3 Available in any depth of bury.
- 4 All hydrants come with ductile iron barrels for strength and corrosion resistance for longer life.
- 5 Has 2³/₁₆" valve opening.
- 6 Inlet can be 2", 2¹/₂" or 3" iron pipe thread. Also available with 2" or 3" mechanical joint inlet.
- 7 Self-draining feature prevents barrel freezing.

Handwheel Option Tamper-Proof Option

- **Handwheel Option** – Permanently or temporarily attached handwheel provides easy opening and closing with no wrench.
- **Tamper-Proof Option** – Recessed pentagon on top screw and side cap(s) prevent unauthorized opening of hydrant. The special wrench needed for operation is provided with each hydrant.

NOTE: Post Hydrants are available in a wide variety of sizes and styles. Post Hydrants are non-stock and are ordered as needed. Please call your local EJP sales office for more information or assistance in ordering.
