Ratchet & Socket Wrenches

Utilities socket wrench sets are specially designed ratchet and torque wrenches with "bolt-thru" sockets. Each ratchet has a quick release socket lever for easy change-over and a convenient reversing switch in the ratchet head for quick two-way motion. These sets are made specifically for the waterworks industry to aid in assembly of pipe joints, valve and fitting connections and to help in installation of clamps and couplings.

Ratchet Wrench Set #511

Ratchet Set #511 Includes:

- Series 500 ratchet handle, 7/8", 1", 1 1/8" and 1 1/4" hexagonal sockets, a corporation socket and a heavy-duty steel box.
Handle length: 12"

Ratchet Torque Wrench Set #513

Ratchet Set #513 Includes:

- Torque wrench 560 (torque range 0-160 lb./ft.) with 1/2" square male drive, ratchet adaptor, 3/4", 7/8", 1", 1 1/16", 1 1/8" and 1 1/4" hexagonal sockets and a heavy-duty steel box.
Handle length: 18 3/4" Adaptor: 3 1/2"

Adjustable Angle Ratchet Set #514

Ratchet Set #514 Includes:

- Adjustable Series 564 handle, 3/4", 7/8", 1", 1 1/16", 1 1/8" and 1 1/4" hexagonal sockets in a heavy-duty steel storage box.
Handle length: 12" Adaptor: 3 1/2"

NOTES:

- The wrench sets shown here are three of the more commonly requested types. Additional sets and specialty wrenches are also available. Please contact your local EJP Sales Office for more information.
- A wide range of specialty sockets are available for these ratchets. Sockets for curb boxes, erie boxes, hydrants, corporation stops, square sockets and extensions are some of the most commonly used. Replacement sockets and handles are available as well as repair parts and kits.

Ratchet & Socket Wrench

These wrenches have two commonly used sizes 1 1/16" for clamps and couplings on one end and 1 1/4" for mechanical joint nuts and bolts on the other end.
