

Water, Sewer & Drain Fittings B-68

800-EJP-24 HR

Corrugated Polyethylene Drain Fittings

90° Elbow

Reducing Tee

45° Elbow

45° Wye

Tee

Installation:

- Split fittings are wrapped around the pipe and secured with nylon ties or wire.
- Spin-on fittings turn over the corrugations of the pipe.
- Snap-on fittings push over the pipe and hold themselves in place.
- Internal fittings are inserted inside the pipe.

NOTES:

- PE drain fittings are designed for use with high density polyethylene tubing. They are made from the same resin as the tubing and are load rated the same as the pipe they are designed for when properly installed. Fittings are available in additional configurations not shown. Please contact your local EJP sales office with your specific needs.
- PE drain fittings are available in sizes 4" thru 48".
