

Hydrants D-28

Captivater® Hydrant Lock

The Captivater® Locking Fire Hydrant Cap

The Captivater® prevents unauthorized hydrant use, eliminates water theft and waste, reduces hydrant vandalism and lowers operation costs. Its universal design fits EVERY hydrant from EVERY manufacturer, regardless of year or model.

Features:

- The Captivater® is the perfect Homeland Security solution:
- The Captivater® fits any make, model or year of hydrant in minutes without modification.
- Provides a safe and easy method to secure fire hydrants.
- Easily installed in minutes without special tools.
- Sealed for protection from the elements, the Captivater® withstands weather and long-term use as well as or better than original caps.
- All Captivater® wrenches are serial numbered, allowing hydrant access to be controlled.
- The Captivater's appearance is the same as a standard hydrant cap.

What Does This Mean?

Your hydrants are secured from unauthorized use, so children and vandals (or people with more sinister plans) cannot gain access to your water system.

Benefits:

- The Captivater® solves security and safety issues.
- It eliminates water theft from hydrants.
- It ensures the availability of water-dependent services.
- Reduces operation costs; revenue loss from open hydrants will be a thing of the past.
- The Captivater® helps conserve your water supply... and by saving water, you save money!

NOTE: For more information please contact your local EJP sales representative.
