

Valve and Service Boxes E-9

Valve Box Accessories

E

E-Z Rise Top Extension

This revolutionary product eliminates excavation of existing valve boxes when raising the valve box is required due to street repaving. Rings are available in four sizes to give flexibility in height and provide a stable bearing surface for the 6" slide riser.

Covers available for water, sewer & gas

DESCRIPTION	HEIGHT	PRODUCT NUMBER
E-Z Rise Cover	—	45271 600

Fixed Valve Box Riser

All fixed risers are designed to set on the cover seat to provide solid support. Flange helps stabilize unit in the pavement. The 5 1/4" opening allows unrestricted wrench access. These straight wall risers use standard valve box covers.

1"- 6" Standard Riser

Lok'n Rise Valve Box Cover

Operation:

- Turning the bolt to the left automatically breaks loose stuck or frozen covers. Its cam action exerts sufficient pressure to dislodge and lift the cover from the seat. It can then be easily removed.
- Turning the bolt to the right securely locks and stabilizes the cover. The arm projections grab and lock to the side walls of the box.
- Protects underground valves. Stops rocking covers on bad seats. Replaces loose or broken covers. Operates with standard pentagon wrench.

DESCRIPTION	PRODUCT NUMBER
Lok'n Rise Valve Box Cover	45000 600

NOTE:

- Lok'n Rise Valve Box Cover can not be used on broken valve box tops.
- Can be used on Slide or Screw type valve boxes.
