

Hydrant Friction Loss Curves

This information concerning flow of pressure is based on limited flow testing. All calculations used to develop this information use not only this flow test data, but also information on system characteristics, as well as other assumed data. Deviation in system characteristics or system design can greatly affect hydrant flow characteristics and calculated data.

To the best of our knowledge this information is accurate. However, it should be used with caution. We provide this data as a service to our customers and designers and cannot accept responsibility for malfunctions resulting from its use.
