

Meter Setters and Check Valves

Meter Setter/Resetter

The Meter Setter/Resetter is designed to easily retrofit existing meter installations to include a dual check backflow preventer. This is accomplished without the high risk of cutting into old service piping, or the expensive process of digging up and replacing existing meter boxes or pits.

The retrofitting can be easily performed in even the most confined meter boxes.

DESCRIPTION	METER SIZE	PRODUCT NUMBER
#51 Basement Resetter	3/8"	52018
#52 Basement Resetter	5/8" x 3/4" & 3/4"	52575
V44-12W Resetter	1"	53027 1

#7 Dual Check Valve for 5/8" thru 1" Meters

The #7 Dual Check Valve assembly is designed to prevent the reverse flow of water. It is suited for installation directly downstream from residential water meters.

It provides protection by containment at the water meter in residential supply service. The Dual Check Valve is a versatile residential water service protector. It operates efficiently in the horizontal or the vertical position and under intermittent or continuous flows.

METER SIZE	OUTLET SIZE	PRODUCT NUMBER	
		PACK JOINT THREAD	FEMALE IRON PIPE
5/8"	3/4"	52046	NS
5/8" x 3/4" & 3/4"	3/4"	52047	52049
1"	1"	52048	NS

NOTE: The #7 Dual Check Valve uses the same Pack Joint Assemblies as the #1-#3 K-Horn. To order refer to page H-30.
