PVC Meter Pits

PVC Meter Pits

The lightweight, high-strength meter pit that saves time and money

PVC Meter Pits are the perfect cost-effective solution to any below ground installation. A lightweight PVC enclosure that's easy to install, corrosion resistant and extra tough.

Features:

- **Lightweight But Strong** — Meter Pits are made of PVC, extruded in a unique ribbed profile. They have an exceptional strength-to-weight ratio that makes them perfect for use in any non-traffic setting. Their light weight saves money on shipping and reduces labor costs with one-man installation.
- **Extra Protection** — PVC pits are impervious to moisture. They also resist acid and alkaline conditions.
- **Easier Meter Reading** — PVC Meter Pits have an off-white color that reflects more light for easier meter reading.
- **Wide Variety Of Diameters & Lengths** — PVC Meter Pits are available in numerous diameters and lengths. Extensions are also available. PVC Meter Pits can be easily cut in the field with an abrasive or fine-toothed circular saw. In-ground cutting can be accomplished with a small electric or air powered disc grinder.

SPECIFICATIONS:

- Material — Rigid PVC, Cell Classification 12344 per ASTM D-1784
- Color — Off-white
- Nominal Wall Thickness — .450"
- Nominal I.D. — 15" to 48"
- Lengths — To meet your installation requirements
- Weight (18" diameter) — 4 lbs./ft.
- Vertical Crush* — 3,000 lbs.
- Side Load (5% deflection)ASTMD-2412, 18" diameter — 80 lbs./ft. of length

* Test determined with free-standing box. Additional field strength gained as the ribs lock into soil during backfilling.

| DESCRIPTION | PRODUCT NUMBER |
|-------------------------------|----------------|
| 18" x 24" Meter Pit w/Notches | 53764 2 |
| 18" x 30" Meter Pit w/Notches | 53765 |
| 18" x 36" Meter Pit w/Notches | 53766 |
| 18" x 48" Meter Pit w/Notches | 53767 |
| 20" x 24" Meter Pit w/Notches | 53768 |
