

Manhole Castings L-36

Round & Square Extension Rings

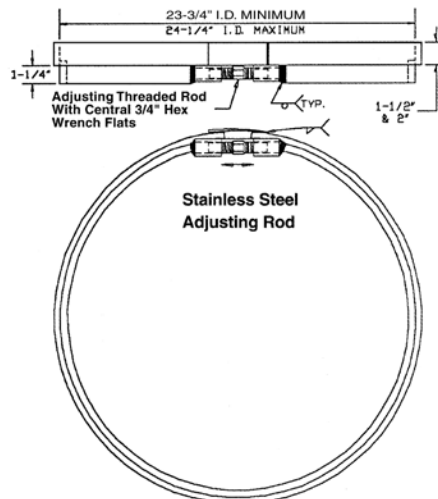

Extension rings are designed to raise the height of the manhole cover or grate without having to raise the frame. One man can quickly install an extension ring, adjust it and replace the cover.

Benefits:

- Saves time and money
- Lightweight and easy to install
- Adjustable for tight fit and close tolerance
- Available in 1", 1½" and 2" heights

Fabricated Steel Specs:

- Risers are manufactured of A-36 steel.
- All welding to American Welding Society specifications.
- Upper sections are 3/8" thick, lower sections are 3/4" thick, continuously welded.
- Adjustment device is solid 3/4" Type 304 stainless steel. Not plated mild steel nuts, which quickly deteriorate after installation.
- Adjustment nus are solid 1" x 1 3/4" C1010 steel.
- Coated with black asphalt paint.

Ordering Info:

- Various designs to meet all street situations. For best possible fit, please supply the following information:
- Cover diameter
- Cover thickness
- Frame seat inside diameter
- The height of rise
