

# Tapping Machine Power Drive & B Series Bits

## Reed 700PD Electric Drive

### For Use With TapMate Too™, B-1, B-Too™, M-1, TapMate Dry Tap and 5935

Reed's 700PD Power Drive is a portable, electric, heavy-duty power drive. 700PD is ½ horsepower, double insulated, turns at 28 RPM (no load) and uses a forward/reverse switch.

For Power Tapping, the TMPDA adapter fits the 1<sup>3</sup>/<sub>16</sub>" boring bar that is common on popular drilling and tapping machines. The operator manually turns the star feed on the tapping or drilling machine while the power drive adapter turns the boring bar. With the 700PDTMPDA option, the Reed 700PD Power Drive comes with a free TMPDA adapter.

**NOTE:** Drive requires electric generator capable of 3500k output or better.

The Reed 700PD Power Drive

The Reed 700PD With The Optional TMPDA Adapter Fits 1<sup>3</sup>/<sub>16</sub>" Boring Bars
