Gate Wrench Extension Stems

Each Extension Stem has a centering ring to keep it aligned in the valve box. It has a 2" heavy square socket on one end and 2" heavy square nut on the other. Shafts are 1 1/4" Sch. 40 pipe. Other shafts available on request.* Optional cup point set screws are available on request.

Standard Extension Stem With Fixed Operating Nut & Fixed Socket

NOTE: Gate Stem Extension bottom and top nuts are available to make your own extension stems. See page 8.

Telescopic Gate Wrenches

Telescopic Gate Wrenches are adjustable at the top and have a positive stop to prevent the bottom section from pulling free. A thumb-loc screw secures the sections in position after length adjustment is made. The straight handle wrench is available in two adjustment lengths; 4'-8" and 6'-10". The folding handle model has an adjustment length of 52"-84". The bottom shaft is made of 1 1/4" heavy wall tubing and the telescopic section is made of 1" square tubing. Both the straight and the folding handles are 24" long and made of 7/8" (straight handle) and 1" (folding handle) solid round stock.
